MASTER CASE SERIES

KNEE

" EACH ONE, TEACH ONE. LEARN ALL."

31st Jan & 01st Feb 2026

The Grand

Nelson Mandela Marg, Pocket 4, Vasant Kunj II, New Delhi, 110070

Registration from

<https://docs.google.com/forms/d/e/1FAIpQLSe4bGcBujJCT8zeT62AV2N2jQakbVRtm7umIRhCfhEmV6Tg7A/viewform>

MASTER CASE SERIES

A MEETING WITH A PURPOSE

Aren't we bored of the same lectures & live surgeries in conferences? MCS is a meeting with a purpose.

The top key opinion leaders of Knee surgery will discuss each of their interesting cases in depth for 30 mins each. A total of 40-50 cases will be presented over 2 days. This is the only closed-door meeting in India where discussion is given greater importance than lectures & live surgeries.

We invite you to be a part of this meeting. There are only 25 seats up for grab on first come first serve basis.

Highlights:

- Master Case Presentations by global leaders
- Interactive Q&A sessions
- Networking opportunities with industry professionals
- Limited Seats Available!

Organising Team

- Dr. Amite Pankaj Aggarwal
- Dr. Atul Mishra
- Dr. Naman Goel
- Dr. Shekhar Srivastav
- Dr. Ankit Varshney
- Dr. Himanshu Gupta
- Dr. Raju Easwaran

Faculty - MCS 5

“Only the speaker’s names (in alphabetical order) and their selected cases will be displayed at this stage. The final scientific agenda will be published soon.”

Wide open physis in a young child with acl tear managed with acl suture and stem cell injections.

Dr. Alessandro Lelli

Knee stiffness after patellar tendon rupture , post tibial tubercle osteotomy

Dr. Amit Joshi

Congenital absence of knee ligaments

Dr. Bibek Basukala

There is a nothing like a minor surgery : Only the surgeon is minor

Dr. Billy Paul Wilson

A new technique of treating PCL avulsion

Dr. Chirag Thonse

Complex unilateral knee reconstruction

Obese lady (42 BMI) with multiple medical issues twice operated in the same knee for ACL + PCL + MCL insufficiency, failed surgery with 4 previous attempts at stabilising the knee

Dr. Debasis Chatterjee

Complex unilateral knee reconstruction

ACL + PCL + MCL injury with MCL invagination

Dr. Deepak Chaudhary

Follow up hati to durghatna ghati (Poor follow up can lead to unforeseen consequences)

The butterfly effect: How lack of proper follow up & misplaced optimism led to a most unusual patellofemoral chondral defect after lateral Meniscal repair.

Dr. Deepak Goyal

DLO with ACLR

Dr. Inderdeep Singh

Complex bilateral knee reconstruction

Bilateral knee injury with patellar tendon rupture, ACL graft re-tear, ramp lesion with knee bankart in one knee & ACL tear with lateral meniscus tear in the other. All operated in a single hospital admission

Dr. Jacob Varghese

TCVO for medial compartment OA

Dr. K. Raghuveer Reddy

Tiger's teeth meniscal repair : A new ferocious suture configuration

Dr. K. Santosh Sahanand

Quadriceps tear due to the rarest of the rare causes

Dr. Kaushal Patel

Synthetics : A ray of hope for the elderly after a TKR complication

Dr. Kunal Khara

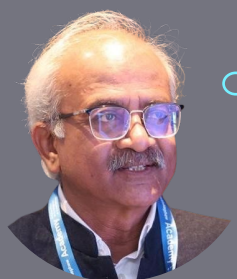

○ ○ Implantless trochleoplasty : Cutting cost without cutting corners

Dr. Lalit Modi

RACLR in a neutrally aligned knee with massive lateral femoral condyle OCD

Dr. Marc Hirner

○ ○ Massive OCD : Do we have allografts in india ?

Dr. Milind Pimprikar

RACLR in previously operated multiligament knee injury

Dr. Miten Sheth

○ ○ DLO for KL4 OA

Dr. Mukesh Laddha

Complex unilateral knee reconstruction

PCL + LCL insufficiency with a fibular head fracture causing need for LCL revision

Dr. Nitesh Gehlot

○ ○ Significantly extruded meniscal root tear : Release and fix / cut and throw

Dr. Nagraj Shetty

Complex unilateral knee reconstruction
multiligament open injury in a child

Dr. Pradeep Kocheeppan

Complex unilateral knee reconstruction

Tibial shaft fracture with comminuted PCL bony avulsion, proximal tibiofibular dislocation, PLC injury & CPN palsy

Dr. Ramakanth Rajagopalakrishnan

Complex unilateral knee reconstruction

A story of a long journey from bony injury (femoral shaft fracture), ligament injury (PCL tear), complex osteotomy, non union of the osteotomy, re-osteosynthesis & an eventual TKR

Dr. Raghbir Khakha

Complex unilateral knee reconstruction

Hoffa fracture MFC +ACL +MCL +LM tear

Dr. Rahul Kakran

Early surgical strike prevents chronic regret in ACL infection

Dr. Rajeev Raman

Complex unilateral knee reconstruction

24 year old grade 4 medial compartment arthritis, grade 4 chondromalacia, medial & lateral meniscal root tears & ACL tear

Dr. Satish B Sonar

Complex unilateral knee reconstruction

Persistent posterior instability resistant to external fixator & Ilizarov with knee stiffness, PCL & MCL insufficiency

Dr. Sarthak Patnaik

Wide open physis in a young child with acl tear managed with physeal sparing technique

Dr. Sachin Tapasvi

Complex unilateral knee reconstruction

21 yr male with knee dislocation KD 3 with neurovascular injury with varus and laxity and foot drop treated with MOWHTO and increasing PT slope in same ostetomy

Dr. Sheetal Kumar Gupta

Hereditary sensory neuropathy & a crooked knee

Dr. S R Sundararajan

Ossification of posterior knee septum

Dr. Srinivas Kambhampati

Complex unilateral knee reconstruction

Grade 3B open knee dislocation in external fixator with patellar tendon, MCL, ACL & PCL insufficiency, staged surgeries with arthrolysis

Dr. Sridhar Gangavarapu

Complex unilateral knee reconstruction

PCL femoral avulsion + grade 4 chondral damage
MFC + loose body

Dr. Subair Khan

TCVO for malunited tibial plateau fracture

Dr. Sunit Hazra

HTO non union

Dr. Thiago Vivacqua

Jammed ACL fixation button : Revise / Refix

Dr. Viraj Shanbhag

Complex unilateral knee reconstruction

Going against the tide; meniscal repair before bi-cruciate reconstruction with synthetic grafts, Will the meniscus heal?

Dr. Vikram Mhaskar

Refractory Anterior knee pain may need a osteotomy

Dr. Willem Jan

Dealing with a broken ACL tibial guide intra - operatively

Dr. Yiftah Beer

Key Note : Master Case Series

Dr. Anant Joshi

Dr. Ashok Rajgopal

Dr Parag Sancheti

Dr. Anant Joshi is the pioneer of arthroscopic surgeries in India. He is the past president of IAS, surgeon to several sports legends including our beloved Sachin Tendulkar & a man with immense experience in the changing landscape of arthroscopic knee surgery. His keynote on the '**Changing landscape of arthroscopic surgery: the good, the bad & the ugly**' will be moderated by another set of legends Dr. Ashok Rajgopal, past president IAS who is credited with **pioneering knee surgery in Delhi** & Dr. Parag Sancheti, past secretary IAS **and pioneer in Knee Arthroscopy**. Arthur Schopenhauer, the noted German philosopher observed: "As a man gains experience in his field, he slowly climbs the mountain of expertise from whose top he can clearly see the multiple criss crossing roads, the shortest paths & dead ends". Dr. Anant Joshi, Dr. Ashok Rajgopal & Dr. Parag Sancheti are already on the summit of the mountain of knee surgery thanks to a lifetime dedicated to the subject & will share their thoughts on how the rapidly changing landscape of knee surgery holds relevance for us today.

Non Orthopedic Experts

Dr. Vaishakhi Rustagi **Consultant Pediatric Endocrinologist**

M.B.B.S: M.D Pediatrics (Gold Medalist)
P.D.C.C in Pediatric Endocrinology, B.V.P Pune
Clinical training at CHOP, Philadelphia, USA
International Scholar Program at NCH , Ohio,
USA

Operating on adolescents often involves drilling across the growth plate. There are natural concerns around growth arrest, coronal & sagittal plane deformities that may happen after a standard adult transphyseal reconstruction of ACL. Physeal sparing techniques though attractive are often non anatomic. In this landscape knowing how to bone age the child may be a challenge. Dr. Vaisakhi is a paediatric endocrinologist specialising in bone age & assessment of growth remaining among other things. She will moderate a session where Dr. Sachin Tapasvi & Dr. Alessandro Lelli will present their techniques of pediatric ACL reconstruction & she will share her pearls of wisdom on what constitutes the bare minimum work up of a child by a sports medicine surgeon to determine bone age.

Non Orthopedic Experts

Dr. Neha Gupta

Infectious Diseases (ID) specialists

MBBS, MD (Medicine), FNB Infectious Diseases (ID), FIDSA (USA)

Infections are thankfully rare in arthroscopic surgery, but when they happen, they often leave the sports medicine surgeon clueless regarding what to do, what tests to order, whether to start an antibiotic & so on. Often an inadequate work up from our end results in negative labs, completing the 'garbage in = garbage out' process. Dr. Neha Gupta is a physician specialising in infectious diseases & among other things, orthopaedic infections. She will moderate cases of infection following sports surgeries presented by Dr. Rajeev Raman & Dr. Sachin Tapasvi & she will share her pearls of wisdom on what constitutes the bare minimum work up of an infected ligament reconstruction case.

Packages:

Residential : ₹40,000

Includes conference registration, accommodation for 2 nights, meals, and access to all sessions

Non-Residential: ₹15,000

Includes conference registration, meals, and access to all sessions

Venue:

The Grand

Nelson Mandela Marg, Pocket 4, Vasant Kunj II, New Delhi, 110070
